### Protect Organization from All Email Threats

SorbSecurity Cloud Email Security (the “SCES”) helps you on securing and controlling both inbound and outbound email through an easy-to-use and easy-to-deploy cloud-based solution. With SCES, you can protect your staff, data and brand reputation from the modern threats includes but not limited to:

- SPAM
- Phishing
- Malware
- Ransomware

### Next Generation Zero Trust Email Solution

SCES keeps your staff safe from all email threats by working with Menlo Security Email Isolation

If you work with both SorbSecurity Cloud Email Security(the “SCES”) and Menlo Security, you can integrate the two products to enhance your security Cloud experience. Menlo Security, as an integrated Secure Web Gateway, monitors and protects your organization’s Email URL/Attachment Clicks enabling you to set policies for isolating and blocking transactions. Together, SCES and Menlo Security provide the following capabilities:

- Seamless deployment of SCES – Protect from Email threats
- Menlo Security’s isolation and block capabilities are automatically applied on browsing
